Dear Parent/Guardian

Year 10 into 11 Mathematics Set Changes for September 2025

As students transition from Year 10 to Year 11, we are pleased to inform you of an important change in our mathematics classes aimed at improving the student-teacher ratio. Starting September 2025, each year half will feature an additional class, resulting in a realignment from six groups to seven. This adjustment will enable us to tailor our teaching more closely to the needs of each group and enhance the learning experience.

The new arrangement of the sets is as follows (subject to change):

- **Sets 1-3:** These sets will continue with the higher-tier course.
- **Remaining sets:** These sets will follow the foundation tier course, with the possibility of moving to the higher tier if success at that level is deemed achievable.

Please note that several students will be moved from their previous groups to accommodate this new structure. These changes will be reflected in the new timetables issued at the beginning of the academic year. All moves have been carefully planned to enhance your child's education. Movement between sets will remain flexible, allowing for regular adjustments based on student development. Decisions to move students will be informed by teacher assessments and results from interim classroom tests.

We believe these changes will provide a more personalized and effective learning environment for all students.

Thank you for your support and understanding.

Yours sincerely

Mrs A Drazic
Co-Head of Mathematics

Mrs H Williams
